

Work Experience

DevOps Engineer at TietoEVERY

Dec 2020 – Jul 2023 (2 yrs 8 mos)

Lviv, Ukraine · Remote

As the primary engineer responsible for supporting and maintaining the Tenable Security Center ("Tenable.sc") and an infrastructure of over 100 active Nessus scanners, I utilized a range of technologies to ensure optimal performance and security. Leveraging Linux, Bash, Python scripting, Jenkins, Gerrit, Git, and Docker, I automated processes and enhanced efficiency.

For monitoring and visualization, I employed Grafana to display metrics, Loki for log storage, and checkmk for comprehensive system monitoring. I used Jenkins to automate Python scripts, such as sending email notifications to users about the status of Nessus scanners within Docker containers.

For troubleshooting, I utilized tools like OpenSSL, traceroute, tcptraceroute, mtr, and curl. When Jenkins wasn't suitable for certain tasks, I automated Bash scripts using cron jobs. I escalated tickets to vendors when necessary and employed Jira Query Language for root cause analysis.

Adopting the Kanban methodology, I effectively tracked and managed my work. Additionally, I developed a script to notify me before SLA expirations, enabling my team and me to provide the best possible service, improve user support, and measure our performance through user satisfaction.

Key Skills:

- **Support and Maintenance:** Tenable.sc, Nessus scanners
- **Administration:** Linux, Bash, Python, Jenkins, Gerrit, Git, Docker
- **Monitoring and Visualization:** Grafana, Loki, checkmk
- **Automation:** Jenkins, cron, Python scripts
- **Troubleshooting:** OpenSSL, traceroute, tcptraceroute, mtr, curl
- **Analysis and Management:** Jira Query Language, Kanban methodology
- **Service Enhancement:** Developed scripts for SLA notifications, improved user support

IT Support (Sys.Admin) and Consultant at Honorary Consulate of the Federal Republic of Germany in Lviv, UA

Sep 2018 – Jan 2023 (4 yrs 5 mos)

Lviv Region, Ukraine · Hybrid

IT Consultant responsible for providing user support. Configured Windows 10 and 11, Office 365, and Endpoint security solutions. Managed VMware ESXi environments, Firewalls, and IDS/IPS systems.

Skills:

- Network Security
- TCP/IP
- Endpoint Security
- Git
- CentOS
- Firewalls

System Administrator (Support Engineer) and DevOps Engineer at Advanced Internet Technologies, Inc. ("AIT, Inc.")

Jun 2020 – Nov 2020 (6 mos)

Fayetteville, North Carolina, United States · Remote

Provided Tier 1 technical support, specializing in the installation and troubleshooting of customer systems. Configured and managed Linux and Windows operating systems, including Windows 10/11 and Windows Server 2012/2016.

Skilled in network configuration on endpoints, Windows Active Directory (AD), Group Policy Objects (GPO), and Windows DNS services. Investigated and resolved security incidents post-hacker breaches, enhancing system security.

Configured DNS servers using Bind and supported the WHOIS database and protocol for accurate domain information and efficient domain name resolution. Deployed websites on cPanel using GitLab pipelines, streamlining the deployment process.

Key Skills:

- Technical Support (Tier 1)
- Operating Systems: Linux, Windows 10/11, Windows Server 2012/2016
- Network Configuration: Endpoints, Windows AD, GPO, Windows DNS
- DNS Servers & Bind
- Email Server Management: Zimbra WEB GUI
- SSL/TLS Certificates Installation
- WHOIS Protocol Support
- Web Deployment: cPanel, GitLab pipelines
- Security Incident Investigation
- SLA Compliance
- Customer Service
- Troubleshooting

Skills:

- TCP/IP
- Git
- Python
- System Administration
- CentOS
- Firewalls
- Multitasking
- SSL Certificates

DevOps Engineer in Tier 1 Team at SoftServe

Mar 2018 – Mar 2020 (2 yrs 1 mo)

Lviv, Ukraine; USA · Hybrid

Worked in a Tier 1 technical support team ensuring the optimal operation of Red Hat and CentOS 7 virtual machines. Used Puppet for user configurations and occasionally utilized Ansible for orchestration.

Configured virtual IP addresses and added Nagios checks for monitoring. Adhered to ITIL practices before implementing production changes. Provided root cause analysis upon client requests.

Developed automation scripts running in Docker containers within Jenkins. Employed Prometheus for metrics collection and Grafana for visualization, improving response times and issue identification.

Managed virtual machines on ESXi and Cisco UCS via vSphere. Utilized CMDB to manage affected nodes and load balancers, ensuring uninterrupted user experience during maintenance.

Skills:

- TCP/IP
- Git
- Python
- CentOS
- Multitasking

Network and System Administrator at Attorneys at Law "Pavlenko & Partners"

Jun 2012 – Jun 2017 (5 yrs 1 mo)

Lviv Region, Ukraine · On-site

Managed and supported client and server operating systems, including Windows XP, 7, 8, 10, macOS, and Windows Server 2003/2008 R2. Administered networks using Mikrotik routers, RouterOS, and implemented Cisco Meraki solutions for SD-WAN and wireless networking.

Optimized network performance through QoS policies and enhanced security with IDS/IPS. Deployed and managed VDI and RDS for efficient remote access. Administered Symantec Endpoint Security and implemented anti-spam solutions using SPAMHAUSE with custom regex.

Streamlined network services using Active Directory, DHCP, and Print Servers. Automated tasks with PowerShell scripting and GPOs. Performed malware and virus remediation using Linux-based tools, booting infected Windows hosts via USB or PXE.

Skills:

- Network Security
- TCP/IP
- Endpoint Security
- Git
- CentOS
- Firewalls

Founder and Network Administrator at OurLan ISP (Own Business)

Aug 2008 – Mar 2015 (6 yrs 8 mos)

Lviv Region, Ukraine · On-site

Installed and administered LAN, MAN, and WAN for ISP network. Managed smart switches, routers, and billing systems. Installed and supported fiber optic cables and UTP/STP cables, including Structured Cabling Systems (SCS).

Built small data centers, mounted servers and network devices into racks, and performed hardware troubleshooting. Gained foundational experience with TCP/IP and related technologies.

Skills:

- TCP/IP
- FreeBSD
- Troubleshooting
- Fiber Optics
- CentOS
- Firewalls
- Switching
- Mikrotik
- SCS (Structured Cabling Systems)

Additional Skills

- Jenkins
- Loki
- Bash
- Networking
- Docker
- Tenable.sc
- Linux
- VPN (Virtual Private Network)
- Nessus Vulnerability Scanner
- Grafana
- IPv6
- ARM Artifactory
- Linux Network Administration
- Network Services
- Systems Management
- SSL Certificates
